The Moving Quill Publishing Co, United Kingdom, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.What is too little known is that the baby inherits a gene code that enables them to learn how to bond with an adult. This coding allows the baby, infant, and child to learn how to gain sympathy and protection for their survival. What is more unknown is that this coding also underlies how the child can develop their intelligence. Imprinting is a process that is very little recognised and yet it does play an integral part in the intelligence process, because it explains exactly why intelligence is reliant upon language and why language is reliant upon emotional sensitivity. After all, when this process of imprinting is impaired by a parent, their infant may not talk, be retarded in their movement, and may show no emotion. When it is fostered in the later school child by the parent and the teacher working together, the child has the potential to learn anything. The 3 dimensional world of the child abruptly changes when they enter that of school. For the world of school is of a 2 dimensional order defined by pen and paper. This world, which the child must continually compete against the drives and insecurities of other children, is defined by rules. The competence developed in the child by their parents, through the language skills they teach them, will much decide the ability of the child to survive in this system. Their ability to know the rules and to learn how to play them, are the foundations for what we will use to define their intelligence. After all, it is a great misconception that all children start as equal when they join the educational...
